DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer does not comply with 37 CFR 1.32(c)(3) because there are more than 10 practitioners listed in the OATH.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 2, 3, and 4 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 11/572,403. Although the conflicting claims are not identical, they are

not patentably distinct from each other because Claim 1 of the application No. 11/572,403 comprises all the limitations of the present claims 1, 2, 3 and 4.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claim 5 and 6 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 2 of copending Application No. 11/572,403. Although the conflicting claims are not identical, they are not patentably distinct from each other because Claim 2 of the application No. 11/572,403 comprises all the limitations of the present claims 5 and 6.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

1. Claim 7 is allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
3. Regarding Claim 7, the closest prior art, **Foster et al. (US Patent No. 4,976,928)** discloses the claimed apparatus and process except for the reactor of Foster et al. is adiabatic and thus cannot operate in pseudo-isothermal conditions. Another prior art, **Koves (US Patent No. 5,405,586)** discloses the claimed apparatus and process except for the isothermal reactor of Koves uses alternate interleaved layers of plate heat exchange elements and reactant channels containing catalyst bed (**Figure**

2) and there is only one radial reaction zone while the claimed apparatus and process recite a radial reaction zone comprising a respective catalyst bed and a plurality of heat exchangers placed in said respective catalytic bed and comprises two reaction zones.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
